**June 30, 2006  
(Date of Posting)**

### **Notice of Competitive Lease Sale Oil and Gas**

We are pleased to announce that we will offer for competitive sale certain Federal lands in the State of Utah for oil and gas leasing. This notice describes-

- The time and place of the sale;
- How to participate in the bidding process;
- The sale process;
- The conditions of the sale;
- How to file a noncompetitive offer after the sale;
- How to file a presale noncompetitive offer.
- How to file a protest.

Attached to this notice is a list of the lands we are offering by parcel number and description. We have included any special conditions or restriction that will be made a part of the lease below each parcel. For your convenience, we are including copies of the bid form and the lease form.

#### **When and where will the sale take place?**

**When:** The competitive oral sale will begin at 9:00 a.m. on Tuesday, August 15, 2006, the room will open at 7:45 a.m. so you can register and get your bidding number.

We will hold the sale at the new Bureau of Land Management State Office, 3 Gateway Building, 440 West 200 South, Fifth Floor, Monument Conference Room 532, Salt Lake City, Utah. There are parking facilities at the building.

**Access:** The sale room is accessible to persons with disabilities. If you need an auxiliary aid or service to participate in the sale, such as sign language interpreter or materials in an alternate format, contact Teresa Thompson (801) 539-4047, by August 1, 2006.

## How do I participate in the bidding process?

To participate in the bidding process, you must register for and get a bidding number. We will begin registering bidders at 7:45 a.m. on the day of the sale. You must display your bid number to the auctioneer when you submit a bid. What is the sale process?

Starting at 9:00 a.m. on the day of the sale-

- The auctioneer will offer the parcels in the order they are shown in the attached list;
- All bids are on a per-acre basis for the entire acreage in the parcel;
- The winning bid is the highest oral bid equal to or exceeding the minimum acceptable bid; and
- The decision of the auctioneer is final.

The minimum bid BLM can accept is \$2 per acre. If a parcel contains fractional acreage, round it up to the next whole acre. For example, a parcel of 100.51 acres requires a minimum bid of \$202 (\$2 x 101 acres). After we have offered all the parcels, you may ask the auctioneer to re-offer any unsold parcels.

## What conditions apply to the lease sale?

- **Parcel withdrawal or sale cancellation:** We reserve the right to withdraw any or all parcels before the sale begins. If we withdraw a parcel, we will post a notice in the Utah State Office Business Information Center (Public Room) before the day of the sale. We will announce withdrawn parcels before beginning the sale. If we cancel the sale, we will notify you as soon as possible.

- **Payment due:** You cannot withdraw a bid. Your bid is a legal binding commitment to sign the bid form, accept the lease, and pay the money due on the day of the sale. You may pay immediately after the sale, but you must pay by 4:30 p.m. on the date of the sale at our Accounting Office on the 5<sup>th</sup> floor of the State Office. You must pay any balance due by the close of business on August 29, 2006, which is the 10<sup>th</sup> working day following the sale. If you do not pay in full by this date, you lose the right to the lease and all money due on the day of the sale. If you forfeit a parcel, we may offer it at a later sale.

For each parcel you win, the money due the day of the sale is the total of the bonus bid deposit (at least \$2 per acre), the first years' rent (\$1.50 per acre); and the administrative fee (\$130).

• **Forms of payment:** You can pay by personal check, certified check, money order, credit card (Discover, Visa, American Express or MasterCard only). Make checks payable to: **Department of the Interior-BLM**. We cannot accept cash. If a check you have sent to us in the past has been returned for insufficient funds, we may ask that you give us a guaranteed payment, such as a certified check. If you pay by credit card and the transaction is refused, we will try to notify you early enough so that you can make other payment arrangements. However, we cannot grant you any extension of time to pay the money that is due the day of the sale.

### **Limitations on Credit Cards and Debit Payments**

**Per IM No. BC-2005-008, Change 1, dated December 13, 2004, effective February 1, 2005 credit or debit cards can not be used for any amount in excess of \$99,999.99 for any purpose.**

• **Bid form:** On the day of the sale, if you are a successful bidder you must give us a properly completed and signed competitive bid form (Form 3000-2, Feb.1991, or later edition) with your payment. This form is a legally binding offer by the prospective lessee to accept a lease and all its terms and conditions. Once the form is signed, you cannot change it. We will not accept any bid form that has information crossed out or is otherwise altered.

We recommend you get a copy of the bid form and complete it prior to the sale. Your completed bid form certifies that:

(1) You and the prospective lessee are qualified to hold an oil and gas lease under our regulations at 43 CFR 3102.5-2; and

(2) Both of you have complied with 18 U.S.C. 1860, a law that prohibits unlawful combinations, intimidation of and collusion among bidders.

A copy of the bid form is included with this notice.

• **Lease Issuance:** After we receive the bid form and all the money due, we can issue the lease. Usually, a lease is effective the first day of the month following the month in which we sign it. If you want your lease to be effective the first day of the month in which we sign it, you must ask us in writing to do this. We have to receive your request before we sign the lease.

• **Lease terms:** A lease issued as a result of this sale will have a primary term of 10 years. It will continue beyond its primary term as long as oil or gas in paying quantities is produced on or for the benefit of the lease. Rental at \$1.50 per acre for the first 5 years (\$2 per acre after that) is due on or before the anniversary date each year until production begins. Once a lease is producing, you must pay a royalty of 12.5 percent on the production. You will find other lease terms on our standard lease form (Form 3100-11, Oct.1992 or later edition). A copy of the lease form is included in this notice.

- **Stipulations:** Some parcels have special requirements or restrictions, which are called stipulations. These are included with the parcel descriptions. Stipulations are part of the lease and supercede any inconsistent provisions of the lease form.

All Federal oil and gas lease rights are granted subject to applicable laws under Section 6 of the lease terms, and lessees must meet certain requirements under the Endangered Species Act, as amended, 16 U.S.C. 1531 et. Seq. In accordance with Washington Office Instruction Memorandum No. 2002-174 each parcel included in this lease sale will be subject to the attached Endangered Species Act Section 7 Consultation Stipulation.

In accordance with WO Instruction Memorandum No. 2005-003, *Cultural Resources and Tribal Consultation, for Fluid Minerals Leasing*, each parcel in this lease sale will be subject to the attached Cultural Resource Protection Stipulation.

### **How do I file a noncompetitive offer after the sale?**

Lands that do not receive a bid are available on a first-come, first-served basis for a two-year period, beginning the day after the sale. If you want to file a noncompetitive offer on an unsold parcel, you must give us-

- An Offer to Lease Form properly completed and signed. **(Note: You may copy the lease form, but you must copy both sides on one page. If you copy the form on 2 pages or use an obsolete lease form, we will reject your offer. Any copy you make should be legible.)** Describe the lands in your offer as specified in our regulations at 43 CFR 3110.5, and;
- Your payment for the total of the \$335 filing fee and the advanced first year's rental (\$1.50 per acre). Remember to round up any fractional acreage when you calculate the amount of rental.

Put the above items in a sealed envelope marked "Noncompetitive Offer" and place the envelope in the drop box in the Utah State Office Information Access Center (Public Room). We consider all offers filed the day of a sale and the first business day after it, for any of the unsold parcels, filed at the same time. If a parcel receives more than one offer, we will hold a drawing to pick the winner. In the list of parcels, we have used an asterisk to mark any that have pending presale offers. A presale offer has priority over any offer filed after the sale.

### **How do I file a noncompetitive presale offer?**

Under our regulations at 43 CFR 3110.1(a), you may file a noncompetitive presale offer for lands that-

- Are available, and;
- Have not been under lease during the previous one-year period, or;
- Have not been included in a competitive lease sale within the previous two-year period.

If we do not receive a bid for the parcel that contains the lands in your offer, it has priority over any offer for that parcel filed after the sale. Your presale offer is your consent to the terms and conditions of the lease, including any additional stipulations. If you want to file a presale offer, follow the directions listed for filing a noncompetitive offer after the sale.

**When is the next competitive oil and gas lease sale scheduled?**

We have tentatively scheduled our next competitive sale for November 21, 2006.

**How can I find out the results of this sale?**

We will post the sale results in the Utah State Office Information Access Center. You can buy (\$5) a printed copy of the results list the Utah State Office Information Access Center. The list will also be available at our public internet site: <http://www.ut.blm.gov/fluidminerals/salenotices.html>

**May I protest BLM's decision to offer the lands in this notice for lease?**

Yes, under regulation 43 CFR 3120.1-3, you may protest the inclusion of a parcel listed in this sale notice. All protest must meet the following requirements:

- We must receive a protest no later than close of business on the 15th calendar day prior to the date of the sale. If our office is not open on the 15th calendar day prior to the date of the sale, a protest received on the next day our office is open to the public will be considered timely filed. The protest must also include any statement of reasons to support the protest. We will dismiss a late-filed protest or a protest filed without a statement of reasons.
- A protest must state the interest of the protesting party in the matter.
- You may file a protest either by mail in hardcopy form or by telefax. Mailed copies should be sent to the Utah State Office Information Access Center by 4:30PM on July 31, 2006. You may not file a protest by electronic mail. A protest filed by fax must be sent to (801) 539-4230. A protest sent to a fax number other than the fax number identified or a protest filed by electronic mail will be dismissed.
- If the party signing the protest is doing so on behalf of an association, partnership or corporation, the signing party must reveal the relationship between them. For example, unless an environmental group authorizes an individual member of its group to act on their behalf, the individual cannot make a protest in the group's name.

**If BLM receives a timely protest of a parcel advertised on this Sale Notice, how does it affect bidding on the parcel?**

We will announce receipt of any protest at the beginning of the sale. We will also announce a decision to either withdraw the parcel or proceed with offering it at the sale.

**If I am the high bidder at the sale for a protested parcel, when will BLM issue my lease?**

We will make every effort to decide the protest within 60 days after the sale. We will issue no lease for a protested parcel until the State Director makes a decision on the protest. If the State Director denies the protest, we will issue your lease concurrently with that decision.

**If I am the successful bidder of a protested parcel, may I withdraw my bid and receive a refund of my first year's rental and bonus bid?**

If we uphold a protest and withdraw the parcel from leasing, we will refund your first year's rental, bonus bid and administrative fee. If the decision upholding the protest results in additional stipulations, we will offer you an opportunity to accept or reject the lease with the additional stipulations prior to lease issuance. If you do not accept the additional stipulations, we will reject your bid and we will refund your first year's rental, bonus bid and administrative fee.

**If BLM's decision to uphold the protest results in additional stipulations, may I appeal that decision?**

Yes, you may. Note, an appeal from the State Director's decision must meet the requirements of Title 43 CFR 4.411 and Part 1840.

**May I appeal BLM's decision to deny my protest?**

Yes, you may. Note, an appeal from the State Director's decision must meet the requirements of Title 43 CFR 4.411 and Part 1840.

**May I withdraw my bid if the protestor files an appeal?**

No. If the protestor appeals our decision to deny the protest, you may not withdraw your bid. We will issue your lease concurrently with the decision to deny the protest. If resolution of the appeal results in lease cancellation, we will authorize a refund of the bonus bid, rentals and administrative fees:

- There is no evidence that the lessee(s) derived any benefit from possession of the lease during the time they held it, and;
- There is no indication of bad faith or other reasons not to refund the rental, bonus bid and administrative fee.

For more information, please contact Teresa Thompson at (801) 539-4047.

### **Cultural Resource Protection – Lease Stipulation**

“This lease may be found to contain historic properties and/or resources protected under the National Historic Preservation Act (NHPA), American Indian Religious Freedom Act, Native American Graves Protection and Repatriation Act, E.O. 13007, or other statutes and executive orders. The BLM will not approve any ground disturbing activities that may affect any such properties or resources until it completes its obligations under applicable requirements of the NHPA and other authorities. The BLM may require modification to exploration or development proposals to protect such properties, or disapprove any activity that is likely to result in adverse effects that cannot be successfully avoided, minimized or mitigated.”

### **Threatened and Endangered Species Act Stipulation**

The lease area may now or hereafter contain plants, animals or their habitats determined to be threatened, endangered, or other special status species. BLM may recommend modifications to exploration and development proposals to further its conservation and management objective to avoid BLM-approved activity that would contribute to a need to list such species or their habitat. BLM may require modifications to or disapprove proposed activity that is likely to result in jeopardy to the continued existence of a proposed or listed threatened or endangered species or result in the destruction or adverse modification of a designated or proposed critical habitat. BLM will not approve any ground-disturbing activity until it completes its obligations under applicable requirements of the Endangered Species Act as amended, 16 U.S.C. 1531 et seq. including completion of any required procedure for conference or consultation.

### NOTICE TO LESSEE

Provisions of the Mineral Leasing Act (MLA) of 1920, as amended by the Federal Coal Leasing Amendments Act of 1976, affect an entity's qualifications to obtain an oil and gas lease. Section 2(a)(2)(A) of the MLA, 30 U.S.C. 201(a)(2)(A), requires that any entity that holds and has held a Federal Coal Lease for 10 years beginning on or after August 4, 1976, and which is not producing coal in commercial quantities from each such lease, cannot qualify for the issuance of any other lease granted under the MLA. Compliance by coal lessees with Section 2(a)(2)(A) is explained in 43 CFR 3472.

In accordance with the terms of this oil and gas lease with respect to compliance by the initial lessee with qualifications concerning Federal coal lease holdings, all assignees and transferees are hereby notified that this oil and gas lease is subject to cancellation if: (1) the initial lessee as assignor or as transferor has falsely certified compliance with Section 2(a)(2)(A) because of a denial or disapproval by a State Office of a pending coal action, i.e., arms-length assignment, relinquishment, or logical mining unit, the initial lessee as assignor or as transferor is no longer in compliance with Section 2(a)(2)(A). The assignee or transferee does not qualify as a bona fide purchaser and, thus, has no rights to bona fide purchaser protection in the event of cancellation of this lease due to noncompliance with Section 2(a)(2)(A).

Information regarding assignor or transferor compliance with Section 2(a)(2)(A) is contained in the lease case file as well as in other Bureau of Land Management records available through the State Office issuing this lease.

### PUBLIC NOTICE

Bidders are reminded that a bid shall not be withdrawn and shall constitute a legally binding commitment to execute the lease bid form and accept a lease, including the obligation to pay the bonus bid, first year's rental, and administrative fee. There have been cases in past oral auctions where the minimum deposit due from the high bidder on the day of the auction was not paid, or was paid by check drawn on an account with insufficient funds. The Bureau of Land Management will be closely monitoring situations of this nature to determine whether further measures should be initiated to protect the integrity of the system.

INSTRUCTIONS

INSTRUCTIONS FOR OIL AND GAS BID  
(Except NPR-A)

1. Separate bid for each parcel is required. Identify parcel by the parcel number assigned in the *Notice of Competitive Lease Sale*.
2. Bid must be accompanied by the national minimum acceptable bid, the first year's rental and the administrative fee. The remittance must be in the form specified in 43 CFR 3103.1-1. The remainder of the bonus bid, if any, must be submitted to the proper BLM office within 10 working days after the last day of the oral auction. Failure to submit the remainder of the bonus bid within 10 working days will result in rejection of the bid offer and forfeiture of all monies paid.
3. If bidder is not the sole party in interest in the lease for which the bid is submitted, all other parties in interest may be required to furnish evidence of their qualifications upon written request by the authorized officer.
4. This bid may be executed (signed) before the oral auction. If signed before the oral auction, this form cannot be modified without being executed again.
5. In view of the above requirement (4), bidder may wish to leave AMOUNT OF BID section blank so that final bid amount may be either completed by the bidder or the Bureau of Land Management at the oral auction.

INSTRUCTIONS FOR GEOTHERMAL OR  
NPR-A OIL AND GAS BID

1. Separate bid for each parcel is required. Identify parcel by the number assigned to a tract.
2. Bid must be accompanied by one-fifth of the total amount of bid. The remittance must be in the form specified in 43 CFR 3220.4 for a Geothermal Resources bid and 3132.2 for a NPR-A lease bid.
3. Mark envelope Bid for Geothermal Resources Lease in (Name of KGRA) or Bid for NPR-A Lease, as appropriate. Be sure correct parcel number of tract on which bid is submitted and date of bid opening are noted plainly on envelope. No bid may be modified or withdrawn unless such modification or withdrawal is received prior to time fixed for opening of bids.
4. Mail or deliver bid to the proper BLM office or place indicated in the *Notice of Competitive Lease Sale*.
5. If bidder is not the sole party in interest in the lease for which bid is submitted, all other parties in interest may be required to furnish evidence of their qualifications upon written request by the authorized officer.

Title 18 U.S.C. Section 1001, makes it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious or fraudulent statements or representations as to any matter within its jurisdiction.

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-01	All of the land in this lease is included in _____. Therefore, no occupancy or disturbance of the surface of the land described in this lease is authorized. The lessee, however, may exploit the oil and gas resources in this lease by directional drilling from sites outside the lease. If a proposed drilling site lies on land administered by the Bureau of Land Management, a permit for use of the site must be obtained from the BLM field manager before drilling or other development begins.
UT-S-02	No access or work trail or road, earth cut or fill, structure or other improvement, other than an active drilling rig, will be permitted if it can be viewed from the _____.
UT-S-03	No occupancy or other activity on the surface of the _____ is allowed under this lease.
UT-S-04	No occupancy or other surface disturbance will be allowed within _____ feet of the _____ located in the _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-05	No drilling or storage facilities will be allowed within _____ feet of _____ located in the _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-06	No occupancy or other surface disturbance in the _____ will be allowed on slopes in excess of _____ percent, without written permission from the authorized officer of the Bureau of Land Management.
UT-S-07	In order to protect _____ exploration, drilling, and other development activity in the _____ will be allowed only during the period from _____. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-08	In order to minimize watershed damage, during muddy and/or wet periods, the authorized officer of the Bureau of Land Management may prohibit exploration, drilling, or other development in the _____. This limitation does not apply to maintenance and operation of producing wells.
UT-S-09	The _____ will not be used as an access road for activities on this lease.
UT-S-10	To maintain esthetic values, all semi-permanent and permanent facilities located in the _____ may require painting or camouflage to blend with the natural surroundings. The paint selection or method of camouflage will be subject to approval by the authorized officer of the Bureau of Land Management.
UT-S-11	<p>In order to minimize watershed damage, exploration, drilling, and other development activity in the _____ will be allowed only during the period from April 30 to November 1. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p> <p>The lessee is informed that the floodplain portions of the lease area require special attention to prevent damage to surface resources and contamination to the Colorado River system located in the _____. Any surface use within such areas will be strictly controlled or restricted where not essential for operations. Appropriate modifications to imposed restrictions will be made for maintenance and operations of producing oil and gas wells.</p> <p>Construction of access roads and drill pads on slopes in excess of 30 percent will require special design standards to minimize watershed damage in the _____. Drilling operations and any associated construction activities on slopes in excess of 50 percent may require directional drilling to prevent damage to the watershed. Exceptions to these limitations may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-12	In order to protect crucial antelope fawning areas, exploration, drilling and other development activity in the ____ will be allowed only from July 2 to April 14. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife biologist in coordination with the Utah Division of Wildlife Resources and, if appropriate, the United States Fish and Wildlife Service. Such a determination may result if fawning is completed early and the fawning area is abandoned earlier to allow for disturbing activities for fluid mineral leasing and exploration to start earlier than July 1.
UT-S-13	In order to protect important antelope habitat, drilling, exploration, and other development activity in the ____ will be allowed only during the period from May 1 to November 30. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-14	<p>No occupancy or other surface disturbance will be allowed within 330 feet of the centerline or within the 100-year recurrence interval floodplain, whichever is greater, of the perennial streams, or within 660 feet of springs, whether flowing or not, located in the _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.</p> <p>In order to minimize watershed damage, exploration, and drilling and other development activity in the ____ will be allowed only during the period from April 30 to November 1. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p> <p>Construction of access roads and drill pads on slopes in excess of 30 percent will require special design standards to minimize watershed damage in the _____. Drilling operations and any associated construction activities on slopes in excess of 50 percent may require directional drilling to prevent damage to the watershed. Exceptions to the limitations may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>
UT-S-15	<p style="text-align: center;"><b>TIMING LIMITATION - CRUCIAL WINTER ELK HABITAT</b></p> <p>No surface use is allowed during the following time period. This stipulation does not apply to operation and maintenance of production facilities. November 1 through March 31.</p> <p>On the lands described below:</p> <p>For the purpose of: Protection of crucial winter elk habitat as discussed in the Book Cliffs Resource Management Plan and EIS (p. 112). UT-S-38	<p style="text-align: center;"><b>NO SURFACE OCCUPANCY - PR SPRING CAMPGROUND</b></p> <p>No surface occupancy or use is allowed on the lands described below:</p> <p>For the purpose of: Protection of the PR Spring Campground as discussed in the Book Cliffs Resource Management Plan and EIS (p. 120).</p>
UT-S-39	<p style="text-align: center;"><b>NO SURFACE OCCUPANCY - ATCHEE RIDGE CAMPGROUND</b></p> <p>No surface occupancy or use is allowed on the lands described below:</p> <p>For the purpose of: Protection of the Atchee Ridge Campground as discussed in the Book Cliffs Resource Management Plan and EIS (p. 120). This stipulation may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
UT-S-40	<p style="text-align: center;"><b>NO SURFACE OCCUPANCY - CHICKEN SPRING CAMPGROUND</b></p> <p>No surface occupancy or use is allowed on the lands described below:</p> <p>For the purpose of: Protection of the Chicken Spring Campground as discussed in the Book Cliffs Resource Management Plan and EIS (p. 120).</p>
UT-S-41	<p style="text-align: center;"><b>TIMING LIMITATION MONUMENT RIDGE CRUCIAL ELK CALVING AND DEER FAWNING HABITAT AND SAGE GROUSE STRUTTING GROUNDS</b></p> <p>No surface use is allowed during the following time period. This stipulation does not apply to operation and maintenance of production facilities. March 15 through May 31.</p> <p>On the lands described below:</p> <p>For the purpose of: Protection of crucial calving and deer fawning habitat and sage grouse strutting grounds as discussed in the Book Cliffs Resource Management Plan and EIS (p. 112). Exceptions to this stipulation in any year must be specifically approved by the authorized officer.</p>
UT-S-42	<p>In order to protect bald eagle roost sites, exploration, and drilling and other development activity within 0.5 mile radius of the sites located in the ____ will be allowed only from March 16 to November 14. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife biologist in coordination with the Utah Division of Wildlife Resources and the United States Fish and Wildlife Service. Such a determination may result if the roost site no longer exists or other roost sites are found to have taken over in importance to the bald eagles present to allow for disturbing activities for fluid mineral leasing and exploration.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
<b>UT-S-43</b>	<p>No occupancy or other surface disturbance will be allowed within 660 feet of springs, whether flowing or not, located in the _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.</p> <p>In order to minimize watershed damage, exploration, and drilling and other development activity in the _____ will be allowed only during the period from April 30 to November 1. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p> <p>Construction of access roads and drill pads on slopes in excess of 30 percent will require special design standards to minimize watershed damage in the _____. Drilling operations and any associated construction activities on slopes in excess of 50 percent will not be allowed. Exceptions to the limitations may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>
<b>UT-S-44</b>	<p>In order to protect crucial elk calving areas, exploration, drilling and other development activity in the _____ will be allowed only from July 1 to April 30. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife biologist in coordination with the Utah Division of Wildlife Resources and, if appropriate, the United States Fish and Wildlife Service. Such a determination may result if calving is completed early and the calving area is abandoned earlier to allow for disturbing activities for fluid mineral leasing and exploration to start earlier than June 30.</p>
<b>UT-S-45</b>	<p>In order to protect crucial elk winter range, exploration, drilling and other development activity in the _____ will be allowed only from May 1 to November 30. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife biologist in coordination with the Utah Division of Wildlife Resources and, if appropriate, the United States Fish and Wildlife Service. Such a determination may result if unseasonably warm weather accounts for the lack of use of elk winter range. Therefore, the lack of elk present on the traditional winter range would allow for such disturbing activities for fluid mineral leasing and exploration.</p>
<b>UT-S-46</b>	<p>In order to protect crucial mule deer fawning areas, exploration, drilling and other development activity in the _____ will be allowed only from August 1 to April 14. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife biologist in coordination with the Utah Division of Wildlife Resources and, if appropriate, the United States Forest Service. Such a determination may result if fawning is completed early and the fawning area is abandoned earlier to allow for disturbing activities for fluid mineral leasing and exploration to start earlier than July 31.</p>
<b>UT-S-47</b>	<p>In order to protect crucial sage grouse breeding complexes, exploration, and drilling and other development activity within 0.5 mile radius of the complexes located in the _____ will be allowed from June 16 to March 14. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife biologist in coordination with the Utah Division of Wildlife Resources (UDWR) and, if appropriate, the United States Fish and Wildlife Service. Such a determination may result if the sage grouse complex has remained inactive over a period of years and it is determined by the BLM and UDWR that the population no longer used the complex and no longer requires protection from disturbing activities for fluid mineral leasing and exploration.</p>
<b>UT-S-48</b>	<p>No occupancy or other surface disturbance will be allowed within 330 feet of the channel centerline of _____ located in portions of the _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>

(For guidance on the use of this stipulation see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)</p>
<b>UT-S-74</b>	<p style="text-align: center;"><b>NO SURFACE OCCUPANCY STIPULATION - SEMI-PRIMITIVE NONMOTORIZED AREAS</b></p> <p>No surface occupancy or use is allowed in semi-primitive, non-motorized areas. On the lands described below:</p> <p>For the purpose of: Protection of visual and primitive recreational qualities (These closures and limitations would not apply to BLM permitted uses that require off-road travel, such as grazing operations) as described in the Diamond Mountain Resource Management Plan and EIS. Waivers, exceptions, or modification to this limitation may be specifically approved in writing by the authorized officer of the Bureau of Land Management if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)</p>
<b>UT-S-75</b>	<p style="text-align: center;"><b>NO SURFACE OCCUPANCY STIPULATION -- BALD EAGLE NEST SITES</b></p> <p>No surface occupancy or use is allowed (does not apply to casual use) within 1/2 mile of known bald eagle nests. This restriction would not apply to maintenance and operation of existing programs and facilities. It would not apply if impacts could be mitigated through other management actions or site specific analysis of terrain features. On the lands described below:</p> <p>For the purpose of: Protection of the bald eagle nest sites as described in the Diamond Mountain Resource Management Plan and EIS. Waivers, exceptions, or modifications to this limitation may be specifically approved in writing by the authorized officer of the Bureau of Land Management if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)</p>
<b>UT-S-76</b>	<p style="text-align: center;"><b>CLOSED TO LEASING -- OURAY NATIONAL WILDLIFE REFUGE</b></p> <p>Lands within the Ouray National Wildlife Refuge are not open to leasing. On the lands described below:</p> <p>For the purpose of: Preserving and protecting the Ouray National Wildlife Refuge as described in the Diamond Mountain Resource Management Plan and EIS. Waivers, exceptions, or modifications to this limitation may be specifically approved in writing by the authorized officer of the Bureau of Land Management. Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation see BLM Manual 1624 and 3101 or FS manual 1950 and 2820.)</p>
<b>UT-S-77</b>	<p>No occupancy or other surface disturbance will be allowed within one-quarter mile of the channel centerline of the Colorado River located in the _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-78	The _____ is within the Cleveland-Lloyd Dinosaur Quarry Buffer Zone. Any surface use or occupancy within these areas will be strictly controlled through close scrutiny of any surface use plan filed to protect paleontological values and the enjoyment of visitors to the quarry. Options held by the Federal Government include relocation of proposed wells and access road, coring of the upper portion of the drill hole or other measures deemed necessary by the authorized officer of the Bureau of Land Management.
UT-S-79	No occupancy or other surface disturbance will be allowed within 330 feet of the centerline or within the 100-year recurrence interval floodplain of the perennial stream _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-80	In order to protect crucial mule deer winter range, exploration, drilling and other development activity in the _____ will be allowed only during the period from April 16 to November 30. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife biologist in coordination with the Utah Division of Wildlife Resources and, if appropriate, the United States Fish and Wildlife Service. Such a determination may result if unseasonably warm weather accounts for the lack of use of mule deer winter range. Therefore, the lack of mule deer present on the traditional winter range would allow for such disturbing activities for fluid mineral leasing and exploration.
UT-S-81	In order to protect riparian/wetland habitat and municipal and non-municipal watershed areas, no occupancy or other surface disturbance will be allowed within 1,200 feet of live water or within 1,200 feet of wetlands as defined by the United States Fish and Wildlife Service in "Classification of Wetlands and Deep Water Habitats of the United States," 1979, page 3 located in the _____. This limitation does not apply to maintenance and operation of producing wells. If the lessee can demonstrate that operations can take place without impact to the resource being protected, an exemption to this stipulation may be granted if approved in writing by the authorized officer in consultation with the District's watershed specialist. For example, exemptions may be allowed where the riparian zone or the hydrologic influence area of phreatophytes exists less than 1,200 feet from live water.
UT-S-82	A lease for the above parcel will be subject to the Highway Material Site Right-of-Way stipulation. <b>DO NOT USE - USE UT-S-97 DELETED</b>
UT-S-83	A lease for the above parcel will be subject to powersite stipulation on Form 3730-1.
UT-S-84	A lease for the above parcel will be subject to special stipulations on Form USO 3100-13.
UT-S-85	A lease for the above parcel will be subject to special stipulations on Form USO 3100-76.
UT-S-86	A lease for the above parcel will be subject to special stipulations on Form USO 3100-79a.
UT-S-87	*This parcel is subject to a prior noncompetitive offer.
UT-S-88	Due to the West Desert Pumping Project and Amax Corporation's evaporation ponds, major areas of public land will be subject to intermittent flooding. Therefore, all leasing of both solid and fluid minerals will be subject to these rights-of-way as delineated on the master title plats. Lessees should be aware that exploration and development may include specific mitigation to protect the project's integrity. This mitigation could greatly increase the lessee's cost.
UT-S-89	The successful bidder will be required to join the _____ Unit Agreement or show reason why a joiner should not be required.
UT-S-90	In order to protect crucial mule deer winter range, exploration, drilling, and other development activity in the _____ will be allowed only during the period from May 1 to October 31. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-91	In order to protect important seasonal wildlife habitat, exploration, drilling, and other development activity in the _____ will be allowed only during the period from May 1 to November 30. Should surface disturbing activities be proposed between May 1 to July 15, a nesting raptor inventory will be required. Should an active nest be found, an appropriate buffer zone around the nest will be established.

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-92	This parcel contains lands that were granted a right-of-way by the United States pursuant to the Right of Way Act of March 3, 1875. Under the Right of Way Leasing Act of May 21, 1930, the lessee of the right-of-way is entitled to a preferential right for the oil and gas deposits under this right-of-way.
UT-S-93	In order to protect elk calving, exploration, drilling, and other development activity in the ____ will be allowed only during the period from July 1 to April 30. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-94	<b>CONDITIONAL NO SURFACE OCCUPANCY:</b> No surface occupancy. The area manager would grant an exception to the no surface occupancy stipulation in the event it is determined, through an environmental analysis (EA), or an environmental impact statement (EIS), that the project with mitigating measures would meet visual quality standards for the area. All seeding must be done with native species.
UT-S-95	<p><b>CONDITIONAL NO SURFACE OCCUPANCY (VALLEY OF THE GODS):</b> No surface occupancy. The area manager would grant an exception to the no surface occupancy stipulation in the event it is determined, through an EA or an EIS, that the project with mitigating measures would meet visual quality standards for the area. All re-vegetation must be done with native species.</p> <p>Activity would be limited to that for which re-vegetation could be successfully established within one year after completion of project. Re-vegetation would only be with native species.</p> <p>Cultural properties eligible for the National Register of Historic Places must be avoided by a sufficient distance to allow permanent protection.</p> <p>If avoidance is not possible, appropriate mitigation would apply, ranging from limited testing to extensive excavation. Any mitigation will fit the specific circumstances and reviewed by the State of Utah Preservation officer and the Advisory Council of Historic Preservation.</p> <p>Re-vegetation efforts for surface disturbance must be successfully established within five years after project completion. Re-vegetation will be deemed successful when seedling are established and tending towards the density that existed before the surface was disturbed.</p> <p>These areas are designated as limited for ORV use. An approved APD can authorize new road construction, but these new roads will be completely rehabilitated upon project completion, except that the authorized officer may request they be left for continued access.</p>
UT-S-96	<b>BLUFF AIRPORT LEASE:</b> Conditions require that any activity proposed on this lease must be consistent with the purpose of an airport and must file with the Federal Aeronautics Administration (FAA) and be bound by FAA regulations.
UT-S-97	<p><b>MATERIAL SITE RIGHTS-OF-WAY:</b></p> <p>Lessee shall conduct operations in conformity with the following requirements:</p> <ol style="list-style-type: none"> <li>(1) The Utah State Department of Highways will have unrestricted rights of ingress of the property.</li> <li>(2) The lease will not conflict with the right of the Utah State Department of Highways to remove any road-building materials from the property.</li> <li>(3) The Utah State Department of Highways reserves the right to set up, operate, and maintain such facilities as are reasonable to expedite the removal, production, and use of the materials; and the lessee shall not interfere with the Highway Department's use of the property for such purposes.</li> </ol>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-98	<p><b>CRUCIAL DEER WINTER RANGE:</b> Closed to surface use during the crucial winter use, December 15 to April 30. This seasonal condition would not affect maintenance, and operation activities for production.</p> <p>The authorized officer may grant exception on a case by case basis if it can be shown that:</p> <ol style="list-style-type: none"> <li>(1) Legal rights would be curtailed;</li> <li>(2) The animals are not present in a specific project location or;</li> <li>(3) The activity can be conducted so as not to adversely affect the animals.</li> </ol> <p>Off-site mitigation may be required when unreclaimed disturbance caused by activity totals more than ten acres in two years. The off-site mitigation must be within the known habitat, but not necessarily within the crucial habitat area. Off-site mitigation will include seeding or planting vegetation favorable to deer. Re-vegetation must be established within five years after project completion. Re-vegetation must be with species palatable to deer and will be deemed successful when seedlings are established and tending towards the density that existed before the surface was disturbed.</p>
UT-S-99	<p><b>CRUCIAL BIGHORN SHEEP HABITAT:</b> Closed to surface use during bighorn sheep lambing (April 1 to July 15) and during the rutting period (October 15 to December 31). These seasonal conditions would not affect maintenance and operation activities for production.</p> <p>The authorized officer may grant exception on a case by case basis if it can be shown that:</p> <ol style="list-style-type: none"> <li>(1) Legal rights would be curtailed;</li> <li>(2) The animals are not present in a specific project location, or;</li> <li>(3) The activity can be conducted so as not to adversely affect the animals.</li> </ol> <p>Off-site mitigation may be required when unreclaimed disturbance caused by activity totals more than ten acres in two years. The off-site mitigation must be within the known habitat, but not necessarily within the crucial habitat area. Off-site mitigation will include seeding or planting vegetation species favorable to bighorn sheep.</p>
UT-S-100	<p><b>BIGHORN SHEEP HABITAT (MESA TOPS):</b> Off-site mitigation is required for activity that disturbs or removes forage and browse species used by desert bighorn sheep. This could include water developments.</p> <p>Closed to surface use during bighorn lambing (April 1 to July 15) and during rutting period (October 15 to December 31). These seasonal conditions would not affect maintenance and operation activities for production.</p>
UT-S-101	<p><b>ANTELOPE HABITAT:</b> Antelope Habitat will be closed during the fawning season (May 15 to June 15). This seasonal condition would not affect maintenance and operation activities for production.</p> <p>The authorized officer may grant exception on a case by case basis if it can be shown that:</p> <ol style="list-style-type: none"> <li>(1) Legal rights would be curtailed;</li> <li>(2) The animals are not present in a specific project, or;</li> <li>(3) The activity can be conducted so as not to adversely affect the animals.</li> </ol> <p>Off-site mitigation may be required when unreclaimed disturbance totals more than ten acres in two years in crucial habitat. The off-site mitigation must be within the known habitat area but not necessarily within crucial habitat. Off-site mitigation could include seeding and planting favorable to antelope, or water could be developed to allow animals to use other parts of the habitat area.</p>
UT-S-102	<p><b>SEMIPRIMITIVE NONMOTORIZED ROS CLASS (SPNM):</b> Conditions require that re-vegetation be established within five years after project completion. Re-vegetation would be deemed successful when seedlings are established and tending towards the density that existed before the surface was disturbed.</p> <p>Construction or development must blend with the natural character of the land.</p> <p>These areas are designated as limited for off-road vehicle (ORV) use, with use limited to designated roads and trails or existing roads and trails. An approved Application for Permit to Drill (APD) can authorize new road construction but these new roads will be completely rehabilitated upon project completion, except that the authorized officer may request they be left for continued access.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
<b>UT-S-103</b>	<b>VISUAL RESOURCE MANAGEMENT (VRM) CLASS II:</b> The area has high quality visual resources. Exploration, drilling and other development or production activities must meet the objectives of VRM Class II.
<b>UT-S-104</b>	<p><b>CEDAR MESA AREA OF CRITICAL ENVIRONMENTAL CONCERN (ACEC):</b> Cultural properties eligible for the National Register of Historic Places must be avoided by a sufficient distance to allow permanent protection. If avoidance is not possible, appropriate mitigation would apply, ranging from limited testing to extensive excavation. Any mitigation will be tailored to fit the specific circumstances and reviewed by the State of Utah Preservation Officer and the Advisory Council of Historic Preservation.</p> <p>Re-vegetation efforts for surface disturbance must be successfully established within five years after project completion. Re-vegetation will be deemed successful when seedlings are established and tending towards the density that existed before the surface was disturbed.</p> <p>These areas are designated as limited for ORV use. An approved APD can authorize new road construction but these new roads will be completely rehabilitated upon project completion, except that the authorized officer may request they be left for continued access.</p>
<b>UT-S-105</b>	<p><b>ALKALI RIDGE AREA OF CRITICAL ENVIRONMENTAL CONCERN (ACEC):</b> Cultural properties eligible for the National Register of Historic Places, must be avoided by a sufficient distance to allow permanent protection. If avoidance is not possible, approved mitigation would apply, ranging from limited testing to extensive excavation. Any mitigation will be tailored to fit the specific circumstances and reviewed by the State of Utah Preservation Officer and the Advisory Council of Historic Preservation.</p> <p>Re-vegetation efforts for surface disturbance must be successfully established within five years after project completion. Re-vegetation will be deemed successful when seedlings are established and tending towards the density that existed before the surface was disturbed.</p> <p>This area is designated as limited for ORV use. An approved APD can authorize new road construction.</p>
<b>UT-S-106</b>	<p><b>SHAY CANYON AREA OF CRITICAL ENVIRONMENTAL CONCERN (ACEC):</b> Cultural resource properties that are eligible for the National Register of Historic Places will be protected by providing a buffer around them of sufficient distance to provide permanent protection to the property. If cultural properties or their buffer cannot be avoided, appropriate mitigation will be applied. These measures range from limited testing to extensive excavation. This mitigation design will be reviewed by the State Historic Preservation officer and the National Advisory Council on Historic Preservation.</p> <p>All activity will meet the standards of BLM VRM Class I.</p> <p>Re-vegetation efforts for surface disturbance must be successfully established within five years after project completion. Re-vegetation will be deemed successful when seedling are established and tending towards the density that existed before the surface was disturbed.</p>
<b>UT-S-107</b>	<p><b>HOVENWEEP AREA OF CRITICAL ENVIRONMENTAL CONCERN (ACEC):</b> All activity will avoid cultural resource properties that are eligible for the National Register of Historic Places by 100 feet. If cultural resources or their avoidance areas cannot be avoided, appropriate mitigation would be applied; such measures range from limited testing to extensive excavation. These mitigation designs will be reviewed by the State Historical Preservation officer and the National Advisory Council on Historic Preservation.</p> <p>Re-vegetation efforts for surface disturbance must be successfully established within five years after project completion. Re-vegetation will be deemed successful when seedlings are established and tending towards the density that existed before the surface was disturbed.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
<b>UT-S-108</b>	<p><b>HOVENWEEP AREA OF CRITICAL ENVIRONMENTAL CONCERN (ACEC) (CAJON POND SPECIAL EMPHASIS AREA):</b> All activity will avoid cultural resource properties that are eligible for the National Register of Historic Places by 100 feet. If cultural resources or their avoidance areas cannot be avoided, appropriate mitigation would be applied; such measures range from limited testing to extensive excavation. These mitigation designs will be reviewed by the State Historical Preservation officer and the National Advisory Council on Historic Preservation.</p> <p>Re-vegetation efforts for surface disturbance must be successfully established within five years after project completion. Re-vegetation will be deemed successful when seedlings are established and tending towards the density that existed before the surface was disturbed.</p> <p>No activity will be allowed during the period of shore bird and waterfowl courtship and nesting (March 1 through June 30).</p>
<b>UT-S-109</b>	<p>In order to protect crucial raptor nesting sites, exploration, and drilling and other development activity within 0.5 mile radius of the sites located in the ____ will be allowed from July 16 to February 28, and not allowed from March 1 through July 15. This limitation does not apply to maintenance and operation of producing wells. Specific exceptions may be granted by the Bureau of Land Management (BLM) if the proposed activity will not seriously disturb wildlife habitat values being protected. This determination will be made by a BLM wildlife habitat biologist in coordination with the Utah Division of Wildlife Resources and, if appropriate, the United States Fish and Wildlife Service. Such a determination may be made if the raptor nest in question is not active at the time of proposed activity. Quite often raptors will have alternate nesting sites available. If a raptor pair is using such an alternative site, it would be necessary to protect the inactive nest from disturbing activities for fluid mineral leasing and exploration. However, it should be noted that all eagle nests, active or inactive, are protected by the Eagle Act and must be left intact and cannot be removed from their original location.</p>
<b>UT-S-110</b>	<p><b>CRITICAL SOILS:</b> The area has critical soil erosion conditions. New roads will be constructed to avoid critical soils where possible. New roads will be constructed with water bars. Riprap may be required. Road grades in excess of 10 percent will not normally be allowed. In special circumstances, where a road grade of more than 10 percent is allowed, its maximum length will be 1,000 feet. Access grading, exploration, drilling or other activities will be prohibited during wet or muddy periods. Cross-country travel will be allowed only when soils are dry or frozen. BLM will determine what is wet, muddy or frozen. The limitation does not apply to maintenance and operation of existing wells.</p> <p>Construction and development are to be avoided on slopes in excess of 6 percent. Operations will be located to reduce erosion and improve the opportunity for re-vegetation within critical soils areas. Reclamation on sites with critical soils will require grading using slopes of 5 percent or less where possible and grading the site so as to collect water for re-vegetation on-site.</p>
<b>UT-S-111</b>	<p><b>LAND LEASES:</b> The land lease is available for uses consistent with the purpose for which the land was leased.</p>
<b>UT-S-112</b>	<p><b>HUNTINGTON AIRPORT LEASE:</b> The land lease is available for uses consistent with the purpose for which the land was leased, with the consent of the airport officials prior to any surface disturbing activity.</p>
<b>UT-S-113</b>	<p><b>BIGHORN SHEEP:</b> In order to protect bighorn sheep lambing habitat, exploration, drilling, and other development activity will be allowed only during the period from June 16 to April 30. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>
<b>UT-S-114</b>	<p><b>ELK and DEER:</b> In order to protect crucial elk and deer winter range, exploration, drilling, and other development activity will be allowed only during the period from April 16 to November 30. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>
<b>UT-S-115</b>	<p><b>ANTELOPE:</b> In order to protect crucial antelope fawning habitat, exploration, drilling and other development activity will be allowed only during the period from June 16 to May 14. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-116	<b>VISUAL RESOURCE MANAGEMENT (VRM) CLASS II:</b> The area has high quality visual resources. Exploration, drilling and other development or production activities must meet the objectives of VRM Class II.
UT-S-117	<b>DRY LAKE AREA OF CRITICAL ENVIRONMENTAL CONCERN (ACEC):</b> Prior to any surface disturbing activity, a cultural study of the entire ACEC will be conducted in order to identify the archaeological values and their spatial, temporal, and cultural relationships.
UT-S-118	<b>TEMPLE MOUNTAIN AREA OF CRITICAL ENVIRONMENTAL CONCERN (ACEC):</b> The ACEC contains historical mining values. No historic structures, including mines, will be disturbed until all salient features have been recorded.
UT-S-119	<b>CONDITIONAL NO SURFACE OCCUPANCY (1-70):</b> No occupancy or other activity on the surface is allowed in this area. An exception may be granted if an environmental assessment concluded that the proposed action would not adversely affect scenic values.
UT-S-120	<b>UNCONDITIONAL NO SURFACE OCCUPANCY:</b> No occupancy or other activity on the surface is allowed in this area.
UT-S-121	In order to protect critical bald eagle roosting sites, exploration, drilling, and other development activity in the ____ will be allowed only during the period from April 1 to October 31, and no roost trees will be cut. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-122	In order to protect crucial waterfowl habitat, exploration, drilling, and other development activity in the ____ will be allowed only during the period from July 16 to March 31. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-123	In order to protect visual resources in Visual Resource Management (VRM) Class II and III areas, activities in these areas will be located and designed in a way to meet Class II and III management criteria. This limitation does not apply to maintenance and operation of producing wells. If the lessee can demonstrate that operations can take place without impact to the resource being protected, an exception to this stipulation may be granted if approved in writing by the authorized officer in consultation with the District's VRM specialist. For Class II areas, exemptions may be granted whereby changes due to the proposed action repeat the basic elements of form, line, color, and texture found in the predominant natural features of the characteristic landscape. For Class III areas, exemptions may be granted whereby changes due to the proposed action repeat the basic elements found in the predominant natural features of the characteristic landscape. This may be achieved through reclamation, topographic or vegetative screening, construction practices and use of non-reflective paints which blend into the viewscape for buildings, tanks, and pipelines.
UT-S-124	In order to protect important sage grouse breeding and nesting habitat, exploration, drilling, and other development activity in the ____ will be allowed only during the period from June 16 to February 28. This limitation does not apply to maintenance and operation of producing wells. There are no exceptions to this stipulation.
UT-S-125	Raptor surveys will be required whenever surface disturbances and/or occupancy proposed in association with oil/gas exploration occur within a known nesting complex for raptors located in the _____. Field surveys will be conducted by the lessee/operator as determined by the authorized officer of the Bureau of Land Management. When surveys are required of the lessee/operator, the consultant hired must be found acceptable to the authorized officer prior to the field survey being conducted. Based on the result of the field survey, the authorized officer will determine appropriate buffer zones.
UT-S-126	In order to prevent fisheries degradation and water pollution, no drilling will be allowed within 500 feet of live water or the reservoirs located in the Fremont and Sevier River drainages or tributaries located in the _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-127	A lease for the above parcel will be subject to special stipulations on Form BOR 3109-1.

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-128	No surface occupancy or other surface disturbance in the ____ will be allowed on slopes in excess of 30 percent without written permission from the authorized officer of the Bureau of Land Management.
UT-S-129	No access or work trail, or road, earth cut or fill, structure or other improvement other than an active drilling rig will be permitted if it can be viewed from the Fisher Towers Campground or access road located in the ____.
UT-S-130	No occupancy will be allowed within 1,200 feet of live water _____. This distance may be modified when specifically approved in writing by the authorized officer of the Bureau of Land Management.
UT-S-131	The lessee is informed that the (lease or land description)_____ is within a sensitive, high use recreation area, and will require special attention to prevent undue damage to the scenic and recreational values. Measures such as natural or artificial screening painting of all production facilities to blend with the landscape, special rehabilitation requirements, or other similar practices will be required as necessary by the Bureau of Land Management.
UT-S-132	No occupancy or other surface disturbance in the ____ will be allowed on slopes in excess of 40 percent without written permission from the authorized officer of the Bureau of Land Management.  In order to minimize watershed damage during the period from November 1 to April 30, exploration, drilling and other development activity in the ____ will be allowed only during dry soil periods, over a snow cover or frozen ground. This limitation does not apply to maintenance and operation of producing wells. Exceptions to this limitation in any year may be specifically authorized in writing by the authorized officer of the Bureau of Land Management.
UT-S-133	No occupancy or other surface disturbance will be allowed within 600 feet of the white tailed prairie dog towns if activity will result in the destruction of the prairie dog town located in the _____. There are no exceptions to this stipulation.
UT-S-134	As provided for at 43 CFR 3141.0-5 (b) an oil and gas lease is a lease issued in a Special Tar Sand Area for the exploration and development of oil and gas resources except for tar sand. Rights granted under this lease are for oil and gas exclusively. By definition at 43 CFR 3141.0-5(e), Tar sand means any consolidated or unconsolidated rock (other than coal, oil shale or gilsonite) that either: (1) contains a hydrocarbonaceous material with gas free viscosity, at original reservoir temperature greater than 10,000 centipoise, or (2) contains a hydrocarbonaceous material and is produced by mining or quarrying.
UT-S-135	As provided for at 43 CFR 3141.0-5 (b) an oil and gas lease is a lease issued in a Special Tar Sand Area for the exploration and development of oil and gas resources except for tar sand. Rights granted under this lease are for oil and gas exclusively.
UT-S-136	<b>Tar Sands Municipal Water Supply</b> The lands under this lease have been formally designated as a municipal water supply reserve for the Town of Sunnyside, Utah. Any surface-disturbing activity shall require approval of the authorized officer of the BLM with concurrence of the Town of Sunnyside prior to any entry upon the surface estate. Any approved exploration, mining, or other surface disturbance shall be subject to complete containment of any runoff water, mine waste, sediment, or any other potential contaminant. Discharge of any type from any disturbed site will not be allowed.
UT-S-137	<b>Tar Sands Slopes</b> No occupancy or other surface disturbance will be allowed on slopes in excess of fifty percent without written permission from the authorized officer of BLM.
UT-S-138	<b>Tar Sands Reclamation</b> No more than 25 percent of the surface area of this lease may be disturbed from surface mining at any given time. Reclamation must be completed and revegetation substantially advanced to the approval of the authorized officer of BLM before additional areas can be disturbed. Exceptions to this requirement may be specifically authorized in writing by the authorized officer of BLM.

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Lease Stipulations
UT-S-139	<p style="text-align: center;"><b>Tar Sands Aquifers</b></p> <p>In order to protect important aquifers, all mineral activities must be preceded by complete hydrological testing and evaluation as specified by the authorized officer of BLM. Any loss of springs or reduction in perennial streamflow will be fully mitigated with an equal quantity and quality, as specified by the authorized officer of the BLM</p>
UT-S-140	<p style="text-align: center;"><b>Tar Sands Deer Winter Range</b></p> <p>In order to protect deer winter range, exploration, drilling and other development activity will be allowed only from May 15 to October 31. This limitation does not apply to maintenance and operation of wells or mines. Exceptions to this limitation in any year may be specifically authorized in writing by the authorized officer of BLM.</p>
UT-S-141	<p style="text-align: center;"><b>Tar Sands Elk and Deer Summer Range</b></p> <p>In order to protect elk and deer summer range, exploration, drilling, and other development activity will be allowed only from July 16 to May 17. This limitation does not apply to maintenance and operation of wells or mines. Exceptions to this limitation in any year may be specifically authorized in writing by the authorized officer of BLM.</p>
UT-S-142	<p style="text-align: center;"><b>Tar Sands Public Water Reserves</b></p> <p>In order to protect public water reserves, surface occupancy will not be allowed in the floodplain and riparian areas of (Creek Name)</p>
UT-S-143	<p style="text-align: center;"><b>Central Pacific Railroad</b></p> <p>All or part of the land in this lease is included in a significant historical site (Central Pacific Railroad Grade). Therefore no occupancy or disturbance of the surface of the land is authorized. If the lessee can demonstrate that operations can take place without impact to the resource being protected, an exemption of this stipulation may be granted if approved in writing by the authorized officer with concurrence of the State Historical Preservation Officer.</p>

Number	Utah's Lease Notices
<b>UT-LN-32</b>	<p style="text-align: center;"><b>LEASE NOTICE -- SEVERE SOIL EROSION &amp; STEEP SLOPES</b></p> <p>The lessee/operator is given notice that the lands in this lease have been identified as having critical to severe soil erosion conditions and slopes exceeding 40%. The authorized officer may prohibit surface disturbing activities during wet and muddy periods to minimize watershed damage. Modifications to the Surface Use Plan of Operations may also be required. This limitation does not apply to operation and maintenance of producing wells.</p>
<b>UT-LN-33</b>	<p style="text-align: center;"><b>LEASE NOTICE: RAPTOR SURVEYS</b></p> <p>Surveys will be required whenever surface disturbances and/or occupancy proposed in association with oil/gas exploration occur within a known nesting complex for raptors. Field surveys will be conducted by the lessee/operator as determined by the authorized officer of the Bureau of Land Management. When surveys are required of the lessee/operator, the consultant hired must be found acceptable to the authorized officer prior to the field survey being conducted. Based on the result of the field survey, the authorized officer will determine appropriate buffer zones.</p>
<b>UT-LN-34</b>	<p style="text-align: center;"><b>LEASE NOTICE: ELK, MULE DEER or MOOSE CRITICALLY VALUED RANGE:</b></p> <p>When surface disturbance exceed 10 acres, from a single project or cumulatively from several related projects, in elk, mule deer or moose critically valued range; the holder shall be required to enhance an equivalent acreage of similar habitat. The rate of enhancement shall be one acre of enhancement for each acre of disturbance. Appropriate enhancement projects will be identified by the authorized officer. All costs associated with project planning through completion shall be the obligation of the lease holder.</p>
<b>UT-LN-35</b>	<p style="text-align: center;"><b>LEASE NOTICE: PALEONTOLOGICAL</b></p> <p>Surface occupancy on this lease may require a paleontological surface survey prior to Application for Permit to Drill approval.</p>
<b>UT-LN-36</b>	<p style="text-align: center;"><b>NOTICE:</b></p> <p>The lessee/operator is given notice that no surface disturbance will be approved by the Bureau of Land Management without the concurrence of the Bureau of Indian Affairs.</p>
<b>UT-LN-37</b>	<p style="text-align: center;"><b>LEASE NOTICE: UTAH SENSITIVE SPECIES:</b></p> <p>The Lessee/operator is given notice that the lands in this parcel have been identified as containing historic habitat for named species on the Utah Sensitive Species List. Modifications to the Surface Use Plan of Operations may be required in order to protect these resources from surface disturbing activities in accordance with Section 6 of the lease terms, Endangered Species Act, and 43 CFR 3101.1-2.</p>
<b>UT-LN-38</b>	<p style="text-align: center;"><b>LEASE NOTICE: NOTIFICATION &amp; CONSULTATION REGARDING CULTURAL RESOURCES:</b></p> <p>The lease area may now or hereafter be found to contain historic properties and/or resources protected under the National Historic Preservation Act (NHPA), the Archaeological Resources Protections Act (ARPA), the Native American Graves Protection and Repatriation Act (NAGPRA), the American Indian Religions Freedom Act (AIRFA), other statutes and Executive Order 13007, and which may be of concern to Native American tribes, interested parties, and the State Historic Preservation Officer (SHPO). BLM will not approve any ground disturbing activities as part of future lease operations until it completes applicable requirements of the National Historic Preservation Act (NHPA), including the completion of any required procedure for notification and consultation with appropriate tribe(s) and/or the SHPO. BLM may require modifications to exploration and development proposals to further its conservation and management objectives on BLM-approved activities that are determine to affect or impact historic or cultural properties and/or resources.</p>
<b>UT-LN-39</b>	<p style="text-align: center;"><b>LEASE NOTICE--ANTELOPE FAWNING:</b></p> <p>The lessee/operator is given notice that lands in this lease have been identified as containing antelope fawning habitat. Exploration, drilling and other development activities may be restricted from May 15 through June 30 to protect antelope fawning.</p>
<b>UT-LN-40</b>	<p style="text-align: center;"><b>LEASE NOTICE--SOILS:</b></p> <p>The lessee/operator is given notice that lands in this lease contain soils that are unusually susceptible to wind and/or water erosion. Best management practices to reduce and/or prevent erosion may be required for operations on the lease. These practices could involve but would not be limited to interim reclamation of well locations and access roads soon after the well is put into production, re-contouring most of the well location and re-topsoiling and re-vegetating the entire well pad with native species, and re-vegetating road cuts, fills and borrow ditches.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Number	Utah's Lease Notices
<b>UT-LN-41</b>	<p style="text-align: center;"><b>LEASE NOTICE -- NOXIOUS WEEDS</b></p> <p>The lessee/operator is given notice that lands in this lease have been identified as containing or are near areas containing noxious weeds. Best management practices to prevent or control noxious weeds may be required for operations on the lease.</p>
<b>UT-LN-42</b>	<p style="text-align: center;"><b>LEASE NOTICE -- WHITE TAILED PRAIRIE DOG</b></p> <p>The lessee/operator is given notice that this lease parcel has been identified as containing White Tailed Prairie Dog habitat. Modifications to the Surface Use Plan of Operations may be required in order to protect White Tailed Prairie Dog from surface disturbing activities in accordance with the Endangered Species Act and in Section 7 consultation procedures.</p>
<b>UT-LN-43</b>	<p style="text-align: center;"><b>PYGMY RABBIT/SAGE GROUSE HABITAT:</b></p> <p>The lessee/operator is given notice that this lease has been identified as containing pygmy rabbit and sage grouse habitat. Modifications to the Surface Use Plan of Operations may be required in order to protect the pygmy rabbit and sage grouse and/or their habitat from surface disturbing activities in accordance with state and range-wide conservation recommendations.</p>
<b>UT-LN-44</b>	<p style="text-align: center;"><b>SAGE GROUSE BROODING AND WINTERING HABITAT:</b></p> <p>The lessee/operator is given notice that this lease parcel has been identified as containing potential sage grouse brooding and wintering habitat. Modifications to the Surface Use Plan of Operations may be required in order to protect the sage grouse and habitat from surface disturbing activities.</p>
<b>UT-LN-45</b>	<p style="text-align: center;"><b>LEASE NOTICE -- WHITE TAILED PRAIRIE DOG HABITAT:</b></p> <p>The lessee/operator is given notice that this lease parcel has been identified as containing white-tailed prairie dog habitat. Modifications to the Surface Use Plan of Operations may be required in order to protect the white-tailed prairie dogs and/or habitat from surface disturbing activities in accordance with state and range-wide conservation recommendations.</p>
<b>UT-LN-46</b>	<p style="text-align: center;"><b>LEASE NOTICE -- SAGE GROUSE LEK HABITAT:</b></p> <p>Exploration, drilling, and other associated development should not be allowed from March 1st to June 15th in order to minimize disturbance to breeding sage grouse. Surface occupancy with historic or presently occupied habitat should be avoided. Permanent development near active or historically active leks should be avoided as they are often considered the focal point of year round activities for non-migratory populations (Braun et. al. 1977. Habitat surrounding the breeding grounds provides the majority of the nesting and early brood rearing habitat. Surveys to determine presence/absence of sage grouse prior to commencing work. To avoid disturbance of leks and nesting habitat during the breeding and nesting period, a 2 mile buffer around leks should remain undisturbed (Connelly et. al. 2000).</p>
<b>UT-LN-47</b>	<p style="text-align: center;"><b>CULTURAL RESOURCES NOTICE:</b></p> <p>This parcel is located in the San Rafael Desert, an area of high concentrations of cultural resources. Known cultural sites are fragile and many are buried under sandy deposits which migrate due to their susceptibility to wind. These sites, or large portions, are not visible from the surface. Therefore, the following mitigation measures may be applied to any surface disturbance of this parcel: 1) pre-surface disturbance cultural resource inventories; 2) pre-surface disturbance subsurface testing; 3) monitoring of ground disturbance; and 4) post-disturbance monitoring identifying resources as the soils stabilize around a project.</p>
<b>UT-LN-48</b>	<p style="text-align: center;"><b>SOUTHWESTERN WILLOW FLYCATCHER NOTICE:</b></p> <p>The lessee/operator is given notice that this lease parcel has been identified as containing potential suitable habitat for the Southwestern Willow Flycatcher. Modifications to the Surface Use Plan may be required in order to protect the willow flycatcher and/or habitat from surface disturbing activities in accordance with the Endangered Species Act and its section 7 consultation procedures.</p>
<b>UT-LN-49</b>	<p style="text-align: center;"><b>LEASE NOTICE-- SAGE GROUSE NESTING AND BROODING HABITAT</b></p> <p>The lessee/operator is given notice that this lease has been identified as containing sage grouse nesting and brooding habitat. Modifications may be required in the Surface Use Plan of Operations to protect the species and its habitat. This notice may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
<b>UT-LN-50</b>	<p style="text-align: center;"><b>LEASE NOTICE-- CRUCIAL MULE DEER WINTER RANGE</b></p> <p>The lessee/operator has been given notice that the area has been identified as containing crucial deer winter range. Usage of the range may occur from November 1 through March 31. Modifications including seasonal restrictions may be required to the Surface Use Plan of Operations in order to protect the winter range. This limitation does not apply to operation and maintenance of producing wells.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

<b>UT-LN-51</b>	<p style="text-align: center;"><b>LEASE NOTICE—GREATER SAGE GROUSE HABITAT-BLM SENSITIVE SPECIES</b></p> <p>The lessee/operator is given notice that lands in this lease have been identified as containing habitat for named species on the BLM Sensitive Species List and the Utah Sensitive Species List. Modifications to the Surface Use Plan of Operations may be required in order to protect any sensitive Species and/or habitat from surface disturbing activities in accordance with Section 6 of the Oil and Gas Lease Terms, Endangered Species Act, and 43 CFR 3101.1-2. This notice may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
<b>UT-LN-52</b>	<p style="text-align: center;"><b>LEASE NOTICE-UTAH SENSITIVE SPECIES</b></p> <p>The lessee/operator is given notice that lands in this parcel have been identified as containing habitat for named species on the Utah Sensitive Species List. Modifications to the Surface Use Plan of Operations may be required in order to protect these resources from surface disturbing activities in accordance with Section 6 of the lease terms, Endangered Species Act, Migratory Bird Treaty Act and 43 CFR 3101.1-2.</p>
<b>UT-LN-53</b>	<p style="text-align: center;"><b>LEASE NOTICE – WHITE TAILED PRAIRIE DOG HABITAT</b></p> <p>The lessee/operator is given notice that this lease has been identified as containing white tailed prairie dog habitat. Modifications to the Surface Use Plan of Operations may be required in order to protect the white tailed prairie dog and/or habitat from surface disturbing activities.</p>
<b>UT-LN-54</b>	<p style="text-align: center;"><b>LEASE NOTICE – SLOPES OF 40% OR GREATER</b></p> <p>The lessee/operator is given notice that lands in this parcel contain slopes 40% or greater. Modifications to the Surface Use Plan of Operations may be required.</p>
<b>UT-LN-55</b>	<p style="text-align: center;"><b>LEASE NOTICE – EXISTING UNPLUGGED WELL</b></p> <p>The lessee/operator is given notice that an existing unplugged well is located n ____ Sec.____, T____, R____ (API# _____). An oil and gas bond adequate to cover plugging costs will be required prior to lease issuance. The well is in need of immediate attention, and the successful bidder should plan to perform work on the well soon after lease issuance</p>
<b>UT-LN-56</b>	<p style="text-align: center;"><b>PRICE FIELD OFFICE</b></p> <p>Under Regulation 43 CFR 3101.1-2 and terms of the lease (BLM Form 3100-11), the authorized officer may require reasonable measures to minimize adverse impacts to other resource values, land uses, and users not addressed in lease stipulations at the time operations are proposed. Such reasonable measures may include, but are not limited to, modification of siting or design of facilities, timing of operations, and specification of interim and final reclamation measures, which may require relocating proposed operations up to 200 meters, but not off the leasehold, and prohibiting surface disturbing activities for up to 60 days.</p> <p>The lands within this lease may include areas not specifically addressed by lease stipulations that may contain special values, may be needed for special purposes, or may require special attention to prevent damage to surface and /or other resources. Possible special areas include steep slopes, surface waters, riparian areas, periods of frozen ground or saturated soils, proximity to highways or other existing rights-of-way, near occupied dwellings, mineral material sites, critical soils and water wells. Any surface use or occupancy within such special areas will be controlled. Appropriate modifications to impose restrictions will be.</p>

# UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Number	Utah's Lease Notices
UT-LN-57	<p style="text-align: center;"><b>Utah Test and Training Range</b></p> <p>All or portions of this parcel are within the Utah Test and Training Range (UTTR) Military Operations Area or Restricted Area. Prior to approval or any operations on the lease The 388<sup>th</sup> Range Squadron Security Office, Hill Air Force Base (801-777-3242) must be contacted for coordination concerning the following requirements:</p> <p><u>Military Operations Area (MOA)</u></p> <ol style="list-style-type: none"> <li>1) The MOA air space starts at 100 ft. above ground surface. No towers or rigs may be installed in excess of 100 ft. above ground level (AGL) without UTTR coordination.</li> <li>2) No permanent construction above 500 AGL is allowed.</li> <li>3) Lease sites may not be permanently manned.</li> <li>4) There can be no limitations on current Chaff (100 ft. AGL) and Flares (2,000 ft. AGL).</li> <li>5) No electronic counter measures (ECM) conflicts/limitations would be allowed. A total frequency review will be required to ensure there is no conflict.</li> <li>6) No noise limitations are allowed.</li> <li>7) No permanent construction above 500' AGL is allowed</li> <li>8) No live weapon overflight limitations will be permitted.</li> </ol> <p>The military will not be liable for wildfire damage.</p> <p><u>Restricted Airspace</u></p> <ol style="list-style-type: none"> <li>1) Restricted Airspace starts at the surface. In addition to the above noted requirements, No towers or rigs will be allowed in excess of 100 ft. AGL without UTTR approval.</li> </ol> <p>Any aerial operations require UTTR scheduling</p>
UT-LN-58	<p style="text-align: center;"><b>Utah sensitive species (Pygmy Rabbit)</b></p> <p>The lessee/operator is given notice that lands in this parcel have been identified as containing habitat for named species on the Utah Sensitive Species List. Modifications to the Surface Use Plan of Operations may be required in order to protect these resources from surface disturbing activities in accordance with Section 6 of the lease terms, Endangered Species Act, and 43 CFR 3101.1-2. This notice may be waived, accepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
UT-LN-59	<p style="text-align: center;"><b>100-YEAR FLOODPLAINS (VFO)</b></p> <p>The lessee/operator is given notice that lands in the lease have been identified as containing 100-year floodplains. Surface occupancy or use is subject to the Floodplain Executive Order No. 11988. Modifications to the Surface Use Plan of Operations may be required for the protection of the floodplains in accordance with the executive order as follows: If the only practical alternative requires the sitting in the floodplain, the action shall be modified in order to minimize potential harm to or within the floodplain; reduce the risk of flood loss; minimize the impact of floods on human safety, health, and welfare; and, restore and preserve the natural and beneficial values served by floodplains. This notice may be waived, excepted, or modified by the authorized officer if the lessee/operator demonstrates that adverse impacts can be mitigated or the resource values have changed.</p>
UT-LN-60	<p style="text-align: center;"><b>RIPARIAN (VFO)</b></p> <p>The lessee/operator is given notice that lands in this lease have been identified as containing riparian areas. Surface occupancy or use is subject to BLM State Riparian Policy (Instruction Memorandum UT89-192). Modifications to the Surface Use Plan of Operations may be required for the protection of the riparian area in accordance with the following riparian policy constraint: No surface use will be allowed within 100 meters of riparian areas unless it can be shown that: 1) There is no practicable alternative; 2) All long-term impacts are fully mitigated; or, 3) Construction is an enhancement to the riparian areas. Protection of riparian areas was discussed in the Book Cliffs Resource Management Plan and EIS (p. 78) and the Diamond Mountain Resource Area Resource Management Plan and Record of Decision (p. 2-36, 2-37). This limitation does not apply to operation and maintenance of producing wells.</p>
UT-LN-61	<p style="text-align: center;"><b>LEASE NOTICE: SAGE GROUSE HABITAT</b></p> <p>The lessee/operator is given notice that lands in this lease have been identified as containing Sage Grouse Habitat. Modifications to the Surface Use Plan may be required in order to protect sage grouse and their habitat from surface disturbing activities in accordance with State and range wide conservation recommendation.</p>
UT-LN-62	<p style="text-align: center;"><b>Black-Footed Ferret</b></p> <p>The Lessee/Operator is given notice that the lands in this lease may contain occupied black-footed ferret habitat, an endangered species under the Endangered Species Act classified as an experimental, nonessential population in the state of Utah. Avoidance and minimization measures that should be followed are included within the <i>Cooperative Plan for the Reintroduction and Management of Black-Footed Ferrets in Coyote Basin, Uintah County, Utah</i> published by the Utah Division of Wildlife Resources in September, 1996. These measures may be updated based on the best available scientific data as it becomes available.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Number	Utah's Lease Notices
<b>UT-LN-63</b>	<p style="text-align: center;"><b>LEASE NOTICE: BLM SENSITIVE SPECIES:</b></p> <p>The Lessee/operator is given notice that the lands in this parcel have been identified as containing historic habitat for named species on the Utah Sensitive Species List. Modifications to the Surface Use Plan of Operations may be required in order to protect these resources from surface disturbing activities in accordance with Section 6 of the lease terms, Endangered Species Act, and 43 CFR 3101.1-2.</p>
<b>UT-LN-64</b>	<p style="text-align: center;"><b>Lease Notice-Site ROW</b></p> <p>The lessee/operator is given notice that lands in this lease have an existing site ROW present. Modifications to the Surface Use Plan of Operations may be required or other appropriate mitigation as deemed necessary by the BLM Authorized Officer in order to protect the valid existing rights.</p>
<b>UT-LN-65</b>	<p style="text-align: center;"><b>Lease Notice-Desert Bighorn Sheep</b></p> <p>The Lessee/Operator is given notice that the lands in this parcel contains habitat for desert bighorn sheep. Modifications to the surface use plan may be required in order to protect habitat from surface disturbing activities. These modifications may include such measures as timing restrictions to avoid surface use during the crucial lambing and rutting seasons. Measure may also include avoidance of certain areas such as water sources and talus slopes.</p>
<b>UT-LN-66</b>	<p style="text-align: center;"><b>Lease Notice - Cultural Resources</b></p> <p>This parcel is located in the San Rafael Desert, an area of high concentrations of cultural resources. Known cultural sites are fragile and many are buried under sandy deposits which migrate due to their susceptibility to wind. These sites, or large portions, are not visible from the surface. Therefore, the following mitigation measures may be applied to any surface disturbance of this parcel: 1) pre-surface disturbance cultural resource inventories; 2) rep-surface disturbance subsurface testing; 3) monitoring of ground disturbance; and 4) post-disturbance monitoring identifying resources as the soils stabilize around a project.</p>
<b>UT-LN-67</b>	<p style="text-align: center;"><b>Lease Notice - VRM Class II</b></p> <p>Visual values and proposed actions will be evaluated to determine appropriate mitigations and conformance with Visual Resource Management Class II objectives.</p>
<b>UT-LN-68</b>	<p>Section 350 of the Energy Policy Act of 2005, enacted August 8, 2005, and amended the Mineral Leasing Act to authorize the Secretary of Interior to issued oil and gas leases in special tar sand areas.</p> <p>Please be advised that all or part of this lease parcel lies within a Special Tar Sands Area.</p> <p>The successful bidder should be aware that special tar sands underlie this lease area. The authorized officer may modify the location or timing of oil and gas activities to provide for future tar sand development.</p>
<b>UT-LN-69</b>	<p style="text-align: center;"><b>RIPARIAN</b></p> <p>The lessee/operator is given notice that this lease has been identified as containing riparian resources. Modifications to the Surface Use Plan of Operations, including no surface occupancy on portions of the parcel, may be required in order to protect riparian resources from surface disturbing activities.</p>
<b>UT-LN-70</b>	<p style="text-align: center;"><b>CULTURAL RESOURCES</b></p> <p>This parcel is located in an area of high concentrations of cultural resources. Known cultural sites are fragile and many are buried under sandy deposits which migrate due to their susceptibility to wind. These sites, or large portions, are not visible from the surface. Therefore, the following mitigation measures may be applied to any surface disturbance of this parcel: 1) pre-surface disturbance cultural resource inventories; 2) pre-surface disturbance subsurface testing; 3) monitoring of ground disturbance; and 4) post-disturbance monitoring identifying resources as the soils stabilize around a project.</p>
<b>UT-LN-71</b>	<p style="text-align: center;"><b>NPS Roads</b></p> <p>The use of National Park Service roads or lands to access the lease is not allowed in accordance with the Capital Reef National Park management plan.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Number	Utah's Lease Notices
<b>UT-LN-72</b>	<p style="text-align: center;"><b>Public Water Reserve</b></p> <p>The lessee/operator is given notice that lands in this lease have been identified as a designated Public Water Reserve. Surface occupancy or use is subject to the Public Water Reserve Executive Order No. 107. Modification to the Surface Use Plan of Operations may be required for the protection of the reserve up to and including no surface occupancy or use. Protection of a designated public water reserve as discussed in Public Water Reserve Executive Order No. 107 and the Book Cliffs Resource Management Plan and EIS (p.123). This limitation does not apply to operations and maintenance of producing wells,. This lease notice may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
<b>UT-LN-73</b>	<p style="text-align: center;"><b>Lease Notice – Critical Deer and Elk Winter Range</b></p> <p>The lessee/operator is given notice that lands in the lease have been identified as containing critical Deer and Elk Winter Range. Modifications including seasonal restrictions may be required to the Surface Use Plan of Operations in order to protect the winter range. This limitation does not apply to operation and maintenance of producing wells. This notice may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
<b>UT-LN-74</b>	<p style="text-align: center;"><b>Lease Notice-High potential for cultural resource occurrence</b></p> <p>The lessee/operator is given notice that lands in this lease contain significant Cultural Resources. Modifications to the Surface Use Plan of Operations may be required for the protection of these resources. Class III level block inventories may be required to determine resource location and possible impact to the resource. This notice may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
<b>UT-LN-75</b>	<p style="text-align: center;"><b>Lease Notice - Erodible soils</b></p> <p>The lessee/operator is given notice that lands in this lease have been identified as having erodible soils. Modifications to the Surface Use Plan of Operations may also be required. This limitation does not apply to operation and maintenance of producing wells. This notice may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
<b>UT-LN-76</b>	<p style="text-align: center;"><b>Lease Notice - Gunnison Sage Grouse</b></p> <p>The lessee/operator is given notice that this lease has been identified as containing sage grouse nesting and brooding habitat. Modifications may be required in the Surface Use Plan of Operations to protect the species and its habitat. This notice may be waived, excepted, or modified by the authorized officer if either the resource values change or the lessee/operator demonstrates that adverse impacts can be mitigated.</p>
<b>UT-LN-77</b>	<p style="text-align: center;"><b>Lease Notice - Gunnison Prairie Dog</b></p> <p>The Lessee/Operator is given notice that the land in this lease contain habitat for Gunnison prairie dogs. Modifications to the surface use plan may be required in order to protect prairie dogs and their habitat from surface disturbing activities. These modifications may include measures to avoid prairie dog colonies.</p>
<b>UT-LN-78</b>	<p style="text-align: center;"><b>Utah State University Study</b></p> <p>This lease is located within a control area for a study underway by Utah State University. This long-term investigation focuses on the impacts of vegetation treatments on sagebrush obligate species and will provide information critical to the management of lands in Rich County. Maintaining the integrity of this control area is necessary to uphold the statistical validity of this study. Well/pad placement shall be closely coordinated to avoid a compromise of this landscape-level study. If practicable, development should be delayed until completion of this study in 2008.</p>

## UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Threatened & Endangered Species Notices
T&E-01	<b>Lease Notice – Bald Eagle</b>
	<p>The Lessee/Operator is given notice that the lands in this parcel contains nesting/winter roost habitat for the bald eagle, a federally listed species. Avoidance or use restrictions may be placed on portions of the lease. Application of appropriate measures will depend on whether the action is temporary or permanent, and whether it occurs within or outside the bald eagle breeding or roosting season. A <u>temporary</u> action is completed prior to the following breeding or roosting season leaving no permanent structures and resulting in no permanent habitat loss. A <u>permanent</u> action continues for more than one breeding or roosting season and/or causes a loss of eagle habitat or displaces eagles through disturbances, i.e. creation of a permanent structure. The following avoidance and minimization measures have been designed to ensure activities carried out on the lease are in compliance with the Endangered Species Act. Integration of, and adherence to these measures will facilitate review and analysis of any submitted permits under the authority of this lease. Following these measures could reduce the scope of Endangered Species Act, Section 7 consultation at the permit stage.</p> <p>Current avoidance and minimization measures include the following:</p> <ol style="list-style-type: none"> <li>1. Surveys will be required prior to operations unless species occupancy and distribution information is complete and available. All Surveys must be conducted by qualified individual(s), and be conducted according to protocol.</li> <li>2. Lease activities will require monitoring throughout the duration of the project. To ensure desired results are being achieved, minimization measures will be evaluated and, if necessary, Section 7 consultation reinitiated.</li> <li>3. Water production will be managed to ensure maintenance or enhancement of riparian habitat.</li> <li>4. Temporary activities within 1.0 mile of nest sites will not occur during the breeding season of January 1 to August 31, unless the area has been surveyed according to protocol and determined to be unoccupied.</li> <li>5. Temporary activities within 0.5 miles of winter roost areas, e.g., cottonwood galleries, will not occur during the winter roost season of November 1 to March 31, unless the area has been surveyed according to protocol and determined to be unoccupied.</li> <li>6. No permanent infrastructure will be placed within 1.0 mile of nest sites.</li> <li>7. No permanent infrastructure will be placed within 0.5 miles of winter roost areas.</li> <li>8. Remove big game carrion to 100 feet from on lease roadways occurring within bald eagle foraging range.</li> <li>9. Avoid loss or disturbance to large cottonwood gallery riparian habitats.</li> <li>10. Where technically and economically feasible, use directional drilling or multiple wells from the same pad to reduce surface disturbance and eliminate drilling in suitable habitat. Utilize directional drilling to avoid direct impacts to large cottonwood gallery riparian habitats. Ensure that such directional drilling does not intercept or degrade alluvial aquifers.</li> <li>11. All areas of surface disturbance within riparian areas and/or adjacent uplands should be re-vegetated with native species.</li> </ol> <p>Additional measures may also be employed to avoid or minimize effects to the species between the lease sale stage and lease development stage. These additional measures will be developed and implemented in consultation with the U.S. Fish and Wildlife Service to ensure continued compliance with the Endangered Species Act.</p>

Stip Number	Utah's Threatened & Endangered Species Notices
T&E-02	<b>Lease Notice – Black-Footed Ferret</b>
	<p>The Lessee/Operator is given notice that the lands in this lease may contain occupied black-footed ferret habitat, an endangered species under the Endangered Species Act classified as an experimental, nonessential population in the state of Utah. Avoidance and minimization measures that should be followed are included within the <i>Cooperative Plan for the Reintroduction and Management of Black-Footed Ferrets in Coyote Basin, Uintah County, Utah</i> published by the Utah Division of Wildlife Resources in September, 1996. Stip Number	Utah's Threatened & Endangered Species Notices
<b>T&amp;E-05</b>	<p style="text-align: center;"><b>Lease Notice – Listed Plant Species</b></p> <p>The Lessee/Operator is given notice that the lands in this parcel contain suitable habitat for federally listed plant species under the Endangered Species Act. The following avoidance and minimization measures have been developed to facilitate review and analysis of any submitted permits under the authority of this lease</p> <ol style="list-style-type: none"> <li>1. Site inventories: <ol style="list-style-type: none"> <li>a. Must be conducted to determine habitat suitability,</li> <li>b. Are required in known or potential habitat for all areas proposed for surface disturbance prior to initiation of project activities, at a time when the plant can be detected, and during appropriate flowering periods,</li> <li>c. Documentation should include, but not be limited to individual plant locations and suitable habitat distributions, and</li> <li>d. All surveys must be conducted by qualified individuals.</li> </ol> </li> <li>2. Lease activities will require monitoring throughout the duration of the project. To endure desired results are being achieved, minimization measures will be evaluated and, if necessary, Section 7 consultation reinitiated.</li> <li>3. Project activities must be designed to avoid direct disturbance to populations and to individual plants: <ol style="list-style-type: none"> <li>a. Designs will avoid concentrating water flows or sediments into plant occupied habitat.</li> <li>b. Construction will occur down slope of plants and populations where feasible; if well pads and roads must be sited upslope, buffers of 100 feet minimum between surface disturbances and plants and populations will be incorporated.</li> <li>c. Where populations occur within 200 ft. of well pads, establish a buffer or fence the individuals or groups of individuals during and post-construction.</li> <li>d. Areas for avoidance will be visually identifiable in the field, e.g., flagging, temporary fencing, rebar, etc.</li> <li>e. For surface pipelines, use a 10 foot buffer from any plant locations: <ol style="list-style-type: none"> <li>i. If on a slope, use stabilizing construction techniques to ensure the pipelines don't move towards the population.</li> </ol> </li> </ol> </li> <li>4. For riparian/wetland-associated species, e.g. Ute ladies-tresses, avoid loss or disturbance of riparian habitats: <ol style="list-style-type: none"> <li>a. Ensure that water extraction or disposal practices do not result in change of hydrologic regime.</li> </ol> </li> <li>5. Limit disturbances to and within suitable habitat by staying on designated routes.</li> <li>6. Limit new access routes created by the project.</li> <li>7. Place signing to limit ATV travel in sensitive areas.</li> <li>8. Implement dust abatement practices near occupied plant habitat.</li> <li>9. All disturbed areas will be re-vegetated with native species comprised of species indigenous to the area.</li> <li>10. Post construction monitoring for invasive species will be required.</li> <li>11. Where technically and economically feasible, use directional drilling or multiple wells from the same pad to reduce surface disturbance and eliminate drilling in plant habitat. Ensure that such directional drilling does not intercept or degrade alluvial aquifers.</li> <li>12. Lease activities will require monitoring throughout the duration of the project. To ensure desired results are being achieved, minimization measures will be evaluated and, if necessary, Section 7 consultation reinitiated.</li> </ol> <p>Additional measures to avoid or minimize effects to the species may be developed and implemented in consultation with the U.S. Fish and Wildlife Service between the lease sale stage and lease development stage to ensure continued compliance with the ESA.</p>

# UTAH AUGUST 2006 OIL AND GAS LEASE SALE LIST

Stip Number	Utah's Threatened & Endangered Species Notices
T&E-06	<p style="text-align: center;"><b>Lease Notice – Mexican Spotted Owl</b></p> <p>The Lessee/Operator is given notice that the lands in this lease contain suitable habitat for Mexican spotted owl, a federally listed species. <b>Insert the following if lease contains Designated Critical Habitat:</b> <i>[The Lessee/Operator is given notice that the lands in this lease contain Designated Critical Habitat for the Mexican spotted owl, a federally listed species. Critical habitat was designated for the Mexican spotted owl on August 31, 2004 (69 FR 53181-53298).]</i> Avoidance or use restrictions may be placed on portions of the lease. Application of appropriate measures will depend whether the action is temporary or permanent, and whether it occurs within or outside the owl nesting season. A <u>temporary</u> action is completed prior to the following breeding season leaving no permanent structures and resulting in no permanent habitat loss. A <u>permanent</u> action continues for more than one breeding season and/or causes a loss of owl habitat or displaces owls through disturbances, i.e. creation of a permanent structure. The following avoidance and minimization measures have been designed to ensure activities carried out on the lease are in compliance with the Endangered Species Act. Integration of, and adherence to these measures, will facilitate review and analysis of any submitted permits under the authority of this lease. Following these measures could reduce the scope of Endangered Species Act, Section 7 consultation at the permit stage.</p> <p>Current avoidance and minimization measures include the following:</p> <ol style="list-style-type: none"> <li>1. Surveys will be required prior to operations unless species occupancy and distribution information is complete and available. All Surveys must be conducted by qualified individual(s).</li> <li>2. Assess habitat suitability for both nesting and foraging using accepted habitat models in conjunction with field reviews. Apply the conservation measures below if project activities occur within 0.5 mile of suitable owl habitat. Determine potential effects of actions to owls and their habitat. <ol style="list-style-type: none"> <li>a. Document type of activity, acreage and location of direct habitat impacts, type and extent of indirect impacts relative to location of suitable owl habitat.</li> <li>b. Document if action is temporary or permanent.</li> </ol> </li> <li>3. Lease activities will require monitoring throughout the duration of the project. To ensure desired results are being achieved, minimization measures will be evaluated and, if necessary, Section 7 consultation reinitiated.</li> <li>4. Water production will be managed to ensure maintenance or enhancement of riparian habitat.</li> <li>5. Where technically and economically feasible, use directional drilling or multiple wells from the same pad to reduce surface disturbance and eliminate drilling in canyon habitat suitable for Mexican spotted owl nesting.</li> <li>6. For all temporary actions that may impact owls or suitable habitat: <ol style="list-style-type: none"> <li>a. If the action occurs entirely outside of the owl breeding season (March 1 – August 31), and leaves no permanent structure or permanent habitat disturbance, action can proceed without an occupancy survey.</li> <li>b. If action will occur during a breeding season, survey for owls prior to commencing activity. If owls are found, activity must be delayed until outside of the breeding season.</li> <li>c. Rehabilitate access routes created by the project through such means as raking out scars, re-vegetation, gating access points, etc.</li> </ol> </li> <li>7. For all permanent actions that may impact owls or suitable habitat: <ol style="list-style-type: none"> <li>a. Survey two consecutive years for owls according to accepted protocol prior to commencing activities.</li> <li>b. If owls are found, no actions will occur within 0.5 mile of identified nest site. If nest site is unknown, no activity will occur within the designated Protected Activity Center (PAC).</li> <li>c. Avoid drilling and permanent structures within 0.5 mi of suitable habitat unless surveyed and not occupied.</li> <li>d. Reduce noise emissions (e.g., use hospital-grade mufflers) to 45 dBA at 0.5 mile from suitable habitat, including canyon rims. Placement of permanent noise-generating facilities should be determined by a noise analysis to ensure noise does not encroach upon a 0.5 mile buffer for suitable habitat, including canyon rims.</li> <li>e. Limit disturbances to and within suitable habitat by staying on approved routes.</li> <li>f. Limit new access routes created by the project.</li> </ol> </li> </ol> <p>Additional measures to avoid or minimize effects to the species may be developed and implemented in consultation with the U.S. Fish and Wildlife Service between the lease sale stage and lease development stage to ensure continued compliance with the ESA.</p>

Integration of, and adherence to these measures will facilitate review and analysis of any submitted permits under the authority of this lease. Following these measures could reduce the scope of Endangered Species Act, Section 7 consultation at the permit stage.</p> <p>Current avoidance and minimization measures include the following:</p> <ol style="list-style-type: none"> <li>1. Surveys will be required prior to operations unless species occupancy and distribution information is complete and available. All Surveys must be conducted by qualified individual(s).</li> <li>2. Lease activities will require monitoring throughout the duration of the project. To endure desired results are being achieved, minimization measures will be evaluated and, if necessary, Section 7 consultation reinitiated.</li> <li>3. Where technically and economically feasible, use directional drilling or multiple wells from the same pad to reduce surface disturbance and eliminate drilling in prairie dog habitat.</li> <li>4. Surface occupancy or other surface disturbing activity will be avoided within 0.5 mile of active prairie dog colonies.</li> <li>5. Permanent surface disturbance or facilities will be avoided within 0.5 mile of potentially suitable, unoccupied prairie dog habitat, identified and mapped by Utah Division of Wildlife Resources since 1976.</li> <li>6. The lessee/operator should consider if fencing infrastructure on well pad, e.g., drill pads, tank batteries, and compressors, would be needed to protect equipment from burrowing activities. In addition, the operator should consider if future surface disturbing activities would be required at the site.</li> <li>7. Within occupied habitat, set a 25 mph speed limit on operator-created and maintained roads.</li> <li>8. Limit disturbances to and within suitable habitat by staying on designated routes.</li> <li>9. Limit new access routes created by the project.</li> </ol> <p>Additional measures to avoid or minimize effects to the species may be developed and implemented in consultation with the U.S. Fish and Wildlife Service between the lease sale stage and lease development stage to ensure continued compliance with the ESA.</p>
